Ping Identity
The Identity Security Company™

Ping Identity: The Preferred SSO Partner for Ultimate Software

> "UltiPro is designed to strengthen people's productivity. Part of that is making sure employees have simple, secure, browser-based access to the solutions they use to run their business. Ping Identity's excellent track record made partnering with it a natural choice."
>

> Ultimate Software

When it comes to adopting HR cloud applications, security is critical. But that's not all: managers want fast employee onboarding; IT wants centralized control and compliance; and users want convenient access.

That's why PingOne Cloud Access Services and UltiPro® are better together. A cloud-deployed Single Sign-On (SSO) solution, PingOne enables IT to provide easy, secure user access to UltiPro.

PingOne Delivers:

- **Stronger Security.** One link from your directory to UltiPro, without exposing sensitive user passwords.

- **Centralized Access Control.** One place for IT to manage single sign-on, access and automated user provisioning—all provided from a simple SaaS-based management console.

- **One Click Access.** Users login just once, gaining immediate access to UltiPro and all of their cloud applications at the office or on the go.
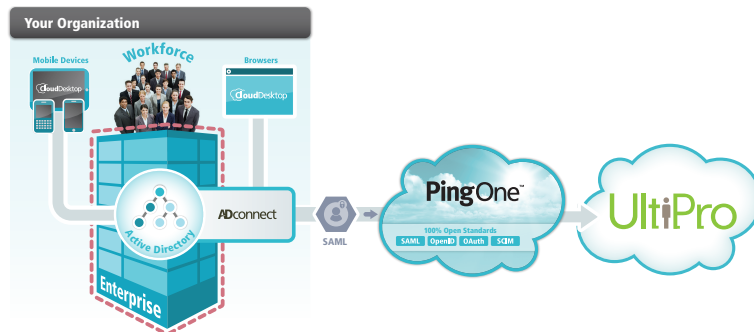

PingOne provides IT with the security of SAML-based SSO and users with convenient one-click access to UltiPro.

Centralize Control with Your Active Directory

Extend Active Directory identities to UltiPro with our lightweight authentication utility, AD Connect. It's included with PingOne for secure convenient SSO.

Connect. Using the SAML standard, AD Connect authenticates users to their cloud applications without storing passwords in the Cloud or opening firewall ports.

Provision. AD Connect eliminates the risks and headaches of adding and removing user accounts from multiple SAML-enabled cloud applications.

Deploy. With "point, click and configure" deployment, AD Connect can be set up in less than 30 minutes all without DNS (Domain Name System) changes.
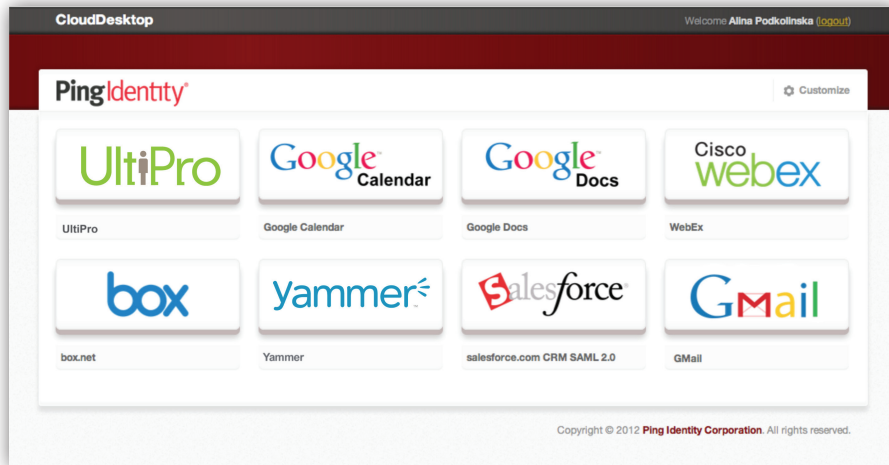

PingOne™

Benefits

- Secure, cloud-based SSO to UltiPro
- Centralized account control
- No passwords for applications
- Simple administration

Easy One-Click Access

CloudDesktop, available with PingOne, makes access to the Cloud even more convenient, allowing users one-click access to all of their cloud applications in a customizable portal.

CloudDesktop creates convenient, unified user access to cloud applications.
